### Product description

Advantages of the hydraulic jack JH 10 G plus

- Slide shoe design inside the guiding track prevents twisting of the piston inside the lifting cylinder. This guarantees better force distribution, less friction and reduced wear compared to conventional jacks.
- Reduced maintenance costs due to easy change slide shoes and removable pump unit.
- Extremely lightweight with high performance due to the use of highquality material and innovative design.
- Continuous adjustment to the load due to swiveling safety toe. Secure stability in every situation even in lifted position.
- Die-forged steel toe provides impact resistance.
