### Product description

Advantages of the hydraulic jack JHS 5

- 180° revolving housing, this allows the jack to be placed with long or with short feet to the load, if there is no space under that.
- Extra-large lift height: JHS 5 with lift toe 250 mm, with top plate maximum 585mm.
- Can also be used horizontally for pressing.
- Safe: because of the use of a separate pump and hoses, more safety distance to the load.
